

A Series of Unfortunate Events (Book 1)

by Lemony Snicket

Review by Tess Z.

This book was about 3 children and their parents die and they have to leave with this awful man. The mean man was named Count Olaf and he made the children do these awful chores like cut wood, fix windows, clean the dirty bathrooms and lots more. The children end up getting away and go live with a new relative that was much nicer.

Why did you like this book?

I liked this book because it was like a book were you could not stop reading and every chapter almost it left you with a cliffhanger. Also it was like a mystery book and there were so many things thats like what's going to happen.

Why should someone read it?

I think you should read this book because if you are not a fan of reading or don't like reading, this book would be a book you would like to read and not stop reading the book. Also once you read this first book, you don't want to stop reading the series because in every one it leaves you with an ending that you're going to be like "no I want to know what happens next."

So when you go to the library I hope you choose this book to read because you will love it!
